MEMBERSHIP BENEFITS FOR PHYSICIANS

• 12 months of membership for only $190
• Access ASN's three leading journals that focus on preventive, therapeutic, international and community-based nutrition science and translational models
• Reduced registration rates for ASN's Scientific Sessions and the Advances & Controversies in Clinical Nutrition conference
• Medical Nutrition News e-newsletter
• Breaking news and information on employment, grant, scholarship and internship opportunities
• Multimedia resources including podcasts, author videos, recorded webinars, videotaped lectures, blog entries and more.
• Eligibility for awards like the Samuel J. Fomon Young Physician Award, which is given for outstanding work in the area of pediatric nutrition.

Additional details are available at www.nutrition.org/ASN or by contacting news@nutrition.org

ADVANTAGES AT-A-GLANCE

• Publications
  Representative of ASN's strength in serving medical practitioners is the success of the association's The American Journal of Clinical Nutrition (AJCN). AJCN, published since 1932, is currently the highest ranked peer-reviewed journal in the U.S. nutrition and dietetics category. ASN's international review journal, Advances in Nutrition, assists in understanding human growth and development and the role nutrition plays in the pathophysiology of disease and disorders. Members of ASN receive free online access to AJCN, Advances in Nutrition (AN) as well as the Society's experimental nutrition journal, The Journal of Nutrition (JN). ASN members are also eligible to receive Nutrition Today at a 58% discount of the regular subscription rate.

• Communities
  An emphasis on medical applications for nutrition research runs throughout ASN's member communities. The Medical Nutrition Council (MNC) is one of ASN's three scientific councils. The MNC serves as the Society's primary mechanism for disseminating nutrition knowledge; promoting policies to prevent and treat nutrition-related diseases; training health professionals; and monitoring national dietary and disease trends. MNC members, including medical students, receive an exclusive monthly newsletter tracking-clinical nutrition and research news. Many of ASN's fifteen Research Interest Sections also feature a translational approach that reinforces the work of the MNC. Through Sections such as Aging and Chronic Disease, Obesity, Diet and Cancer, and Nutritional Immunology, ASN promotes knowledge exchange and the advancement and application of nutrition science in patient settings. Several of ASN's committees also focus on issues relevant to physicians, such as the Nutrition Education in Professional Schools Subcommittee.
