Editorials

235 Eggs and beyond: is dietary cholesterol no longer important? RH Eckel
See corresponding article on page 276.

237 Studying dietary phosphorus intake: the challenge of when a gram is not a gram. Km Hill Gallant
See corresponding article on page 444.

Statistical Commentaries

239 Introduction to the series “Best (but Oft-Forgotten) Practices”. DM Bier, DB Allison, DH Alpers, A Astrup, KD Cashman, PM Coates, NK Fukagawa, DM Klurfeld, RD Mattes, and R Uauy

241 Best (but oft-forgotten) practices: designing, analyzing, and reporting cluster randomized controlled trials. AW Brown, P Li, MM Bohan Brown, KA Kaiser, SW Keith, JM Oakes, and DB Allison

Original Research Communications

Obesity and eating disorders

249 Harnessing the power of disgust: a randomized trial to reduce high-calorie food appeal through implicit priming. KT Legget, M-A Cornier, DC Rojas, B Lawful, and JR Tregellas

256 Global metabolomic profiling targeting childhood obesity in the Hispanic population. NF Butte, Y Liu, IF Zakeri, RP Mohney, N Mehta, VS Voruganti, H Göring, SA Cole, and AG Comuzzie

268 Healthy obesity and objective physical activity. JA Bell, M Hamer, VT van Hees, A Singh-Manoux, M Kivimäki, and S Sabia

Cardiovascular disease risk

276 Dietary cholesterol and cardiovascular disease: a systematic review and meta-analysis. S Berger, G Raman, R Vishwanathan, PF Jacques, and EJ Johnson
See corresponding editorial on page 235.

295 Cesarean delivery and metabolic risk factors in young adults: a Brazilian birth cohort study. JR Bernardi, TV Pinheiro, NT Mueller, HAS Goldani, MRP Gutierrez, H Bettiol, AAM da Silva, MA Barbieri, and MZ Goldani

302 Dietary Approaches to Stop Hypertension diet retains effectiveness to reduce blood pressure when lean pork is substituted for chicken and fish as the predominant source of protein. RD Sayer, AJ Wright, N Chen, and WW Campbell

309 Butter increased total and LDL cholesterol compared with olive oil but resulted in higher HDL cholesterol compared with a habitual diet. S Engel and T Tholstrup

Nutritional status, dietary intake, and body composition

316 A generic coding approach for the examination of meal patterns. C Woolhead, MJ Gibney, MC Walsh, L Brennan, and ER Gibney

324 Eating under observation: a systematic review and meta-analysis of the effect that heightened awareness of observation has on laboratory measured energy intake. E Robinson, CA Hardman, JCG Halford, and A Jones

338 Does fortification of staple foods improve vitamin D intakes and status of groups at risk of deficiency? A United Kingdom modeling study. RE Allen, AD Dangour, AE Tedstone, and Z Chalabi

Carbohydrate metabolism and diabetes

Energy and protein metabolism
353 Validation of an inexpensive and accurate mathematical method to measure long-term changes in free-living energy intake. A Sanghvi, LM Redman, CK Martin, E Ravussin, and KD Hall

Vitamins, minerals, and phytochemicals
368 Absence of an effect of high nitrate intake from beetroot juice on blood pressure in treated hypertensive individuals: a randomized controlled trial. CP Bondonno, AH Liu, KD Croft, NC Ward, S Shinde, Y Moodley, JO Lundberg, IB Puddey, RJ Woodman, and JM Hodgson
376 Dietary magnesium and potassium intakes and circulating magnesium are associated with heel bone ultrasound attenuation and osteoporotic fracture risk in the EPIC-Norfolk cohort study. RPG Hayhoe, MAH Lentjes, RN Luben, K-T Khaw, and AA Welch
385 Insulin secretion and sensitivity in healthy adults with low vitamin D are not affected by high-dose ergocalciferol administration: a randomized controlled trial. DM Mitchell, BZ Leder, E Cagliero, N Mendoza, MP Henao, DL Hayden, JS Finkelstein, and S-AM Burnett-Bowie

Pregnancy and lactation
393 Maternal prepregnancy waist circumference and BMI in relation to gestational weight gain and breastfeeding behavior: the CARDIA study. H Kirkegaard, EA Nohr, KM Rasmussen, H Stovring, TIA Sørensen, CE Lewis, and EP Gunderson
402 Maternal vitamin D₃ supplementation at 50 µg/d protects against low serum 25-hydroxyvitamin D in infants at 8 wk of age: a randomized controlled trial of 3 doses of vitamin D beginning in gestation and continued in lactation. KM March, NN Chen, CD Karakochuk, AW Shand, SM Innis, P von Dadelszen, SI Barr, MR Lyon, SJ Whiting, HA Weiler, and TJ Green

Cancer
411 Dietary polyamine intake and colorectal cancer risk in postmenopausal women. AJ Vargas, EL Ashbeck, BC Wertheim, RB Wallace, ML Neuhouser, CA Thomson, and PA Thompson
420 Vitamin and carotenoid intake and risk of head-neck cancer subtypes in the Netherlands Cohort Study. L de Munter, DHE Maasland, PA van den Brandt, B Kremer, and LJ Schouten

Nutritional epidemiology and public health
444 Association of dietary phosphate and serum phosphorus concentration by levels of kidney function. LW Moore, JV Nolte, AO Gaber, and WN Suki
See corresponding editorial on page 237.
454 High glycemlc index diet as a risk factor for depression: analyses from the Women’s Health Initiative. JE Gangwisch, L Hale, L Garcia, D Malaspina, MG Opler, ME Payne, RC Rossom, and D Lane
464 Health effects of intermittent fasting: hormesis or harm? A systematic review. BD Horne, JB Muhlestein, and JL Anderson
471 Prospective association between dietary folate intake and skin cancer risk: results from the Supplémentation en Vitamines et Minéraux Antioxydants cohort. M Donnenfeld, M Deschasaux, P Latino-Martel, A Diello, P Galan, S Hercberg, K Ezzedine, and M Touvier
479 Olive oil consumption and risk of type 2 diabetes in US women. M Guasch-Ferré, A Hruby, J Salas-Salvador, MA Martinez-Gonzalez, Q Sun, WC Willett, and FB Hu
479 Milk intake is not associated with low risk of diabetes or overweight-obesity: a Mendelian randomization study in 97,811 Danish individuals. HKM Bergholdt, BG Nordestgaard, and C Ellervik
International nutrition

High provitamin A carotenoid serum concentrations, elevated retinyl esters, and saturated retinol-binding protein in Zambian preschool children are consistent with the presence of high liver vitamin A stores. *S Mondloch, BM Gannon, CR Davis, J Chileshe, C Kaliwile, C Masi, L Rios-Avila, JF Gregory III, and SA Tanumihardjo*

Gene-nutrient interactions

Interaction between BMI and APOE genotype is associated with changes in the plasma long-chain–PUFA response to a fish-oil supplement in healthy participants. *R Chouinard-Watkins, V Conway, AM Minihane, KG Jackson, JA Lovegrove, and M Plourde*

Neuropeptide Y genotype, central obesity, and abdominal fat distribution: the POUNDS LOST trial. *X Lin, Q Qi, Y Zheng, T Huang, M Lathrop, D Zelenika, GA Bray, FM Sacks, LJiang, and L Qi*

Letters to the Editor

Uncertainties of assessing total body vitamin A stores in community settings in low-income countries using the stable-isotope dilution methodology. *G Lietz, M Haskell, and A Melse-Boonstra*

Reply to G Lietz et al. *SA Tanumihardjo, BM Gannon, C Kaliwile, and J Chileshe*
