Editorials

711  The dilemma of hyperemesis gravidarum: more answers, and more questions. RC Boelig
See corresponding article on page 812.

713  Rapid standardized enteral feeding strategy in preterm infants: is it safe?
JB van Goudoever
See corresponding article on page 821.

715  Consumption of protein beverages as a strategy to promote increased energy intake in
older adults. HJ Leidy
See corresponding article on page 865.

Commentary

717  Ultra-processed foods in human health: a critical appraisal. MJ Gibney, CG Forde, D Mullally, and ER Gibney

Original Research Communications

Obesity and eating disorders

725  Duodenal and ileal glucose infusions differentially alter gastrointestinal peptides, appetite response, and food intake: a tube feeding study. SD Poppitt, HS Shin, A-T McGill, SC Budgett, K Lo, M Pahl, J Duxfield, M Lane, and JR Ingram

736  Transcriptome profiling from adipose tissue during a low-calorie diet reveals predictors of weight and glycemic outcomes in obese, nondiabetic subjects. C Armenise, G Lefebvre, J Carayol, S Bonnel, J Bolton, A Di Cara, N Gheldof, P Descombes, D Langin, WHM Saris, A Astrup, J Hager, N Vigueuri, and A Valsesia

747  A review of the characteristics of dietary fibers relevant to appetite and energy intake outcomes in human intervention trials. KS Poutanen, P Dussort, A Erkner, S Fiszman, K Karnik, M Kristensen, CFM Marsaux, S Miquel-Kergoat, SP Pentikainen, P Putz, JL Slavin, RE Steinert, and DJ Mela

764  Assessing the causal role of adiposity on disordered eating in childhood, adolescence, and adulthood: a Mendelian randomization analysis. ZE Reed, N Micali, CM Bulik, G Davey Smith, and KH Wade

Cardiovascular disease risk

Nutritional status, dietary intake, and body composition

783  Testing the direction of effects between child body composition and restrictive feeding practices: results from a population-based cohort. IPM Derks, H Triereer, EJG Sijbrands, JM Nicholson, T Voortman, FC Verhulst, WWV Jaddoe, and PW Jansen

Vitamins, minerals, and phytochemicals

801  A systematic review and meta-analysis of the effects of isoflavone formulations against estrogen-deficient bone resorption in peri- and postmenopausal women. MNT Lambert, LM Hu, and PB Jeppesen
Pregnancy and lactation

812 Early enteral tube feeding in optimizing treatment of hyperemesis gravidarum: the Maternal and Offspring outcomes after Treatment of HyperEmesis by Refeeding (MOTHER) randomized controlled trial. IJ Grooten, MH Koot, JAM van der Post, JMJ Bais, C Ris-Stalpers, C Naaktgeboren, HA Bremer, DP van der Ham, WM Heidema, A Huisjes, G Kleverda, S Kuppens, JOEH van Laar, J Langenveld, F van der Made, MG van Pampus, D Papatonis, M-J Pelinck, PJ Pernet, L van Rheenen, RJ Rijnders, HJC Scheepers, TE Vogelvang, BW Mol, TJ Roseboom, and RC Painter
See corresponding editorial on page 711.

Growth, development, and pediatrics

See corresponding editorial on page 713.

Digestive and liver diseases

831 The use of metabolic balance studies in the objective discrimination between intestinal insufficiency and intestinal failure. AP Prahm, CF Brandt, C Askov-Hansen, PB Mortensen, and PB Jeppesen

Nutritional support

839 Taurolidine-citrate-heparin lock reduces catheter-related bloodstream infections in intestinal failure patients dependent on home parenteral support: a randomized, placebo-controlled trial. S Tribler, CF Brandt, AH Petersen, JH Petersen, KA Fuglsang, M Staun, P Broebech, CE Moser, and PB Jeppesen

Cancer

849 Randomized controlled trial of dietary fiber for the prevention of radiation-induced gastrointestinal toxicity during pelvic radiotherapy. L Wedlake, C Shaw, H McNair, A Lalji, K Mohamned, T Kloppen, L Allan, D Tait, M Hawkins, N Somaiah, S Lalondrelle, A Taylor, N VanAs, A Stewart, S Essapen, H Gage, K Whelan, and HNJ Andreyev

858 Nut and peanut butter consumption and the risk of esophageal and gastric cancer subtypes. M Hashemian, G Murphy, A Etemadi, SM Dawsey, LM Liao, and CC Abnet

Aging

See corresponding editorial on page 715.

Nutritional epidemiology and public health

895 Dietary fatty acid intake after myocardial infarction: a theoretical substitution analysis of the Alpha Omega Cohort. FJM Mölenberg, J de Goede, AJ Wanders, PL Zock, D Kromhout, and JM Geleijnse

Gene-nutrient interactions

902 Effect of the interaction between diet composition and the PPM1K genetic variant on insulin resistance and β cell function markers during weight loss: results from the Nutrient Gene Interactions in Human Obesity: implications for dietary guidelines (NUGENOB) randomized trial. L Goni, L Qi, M Cuervo, FI Milagro, WH Saris, IA MacDonald, D Langin, A Astrup, P Arner, J-M Oppert, M Svendstrup, EE Blaak, TIA Serensen, T Hansen, and JA Martínez

Bone metabolism

909 Combined bioavailable isoflavones and probiotics improve bone status and estrogen metabolism in postmenopausal osteopenic women: a randomized controlled trial. MNT Lambert, CB Thybo, S Lykkeboe, LM Rasmussen, X Frette, LP Christensen, and PB Jeppesen
Dietary supplements

921 The effect of magnesium supplementation on blood pressure in individuals with insulin resistance, prediabetes, or noncommunicable chronic diseases: a meta-analysis of randomized controlled trials. DT Dibaba, P Xun, Y Song, A Rosanoff, M Shechter, and K He

930 Short-chain fatty acids, prebiotics, synbiotics, and systemic inflammation: a systematic review and meta-analysis. RF McLoughlin, BS Berthon, ME Jensen, KJ Baines, and LG Wood

Letters to the Editor

946 Substitution of whole grains for refined grains: a means to avoid excess B-vitamin intake. S-S Zhou and Y Zhou

947 Reply to S-S Zhou and Y Zhou. JP Karl, SN Meydani, and SB Roberts

948 Moderate-to-vigorous physical activity, but not sedentary time, predicts changes in cardiometabolic risk factors in 10-y-old children: the Active Smarter Kids Study. A Lu and R Wang

948 Reply to A Lu and R Wang. U Ekelund and T Skrede

949 The use of implausible data without caveats is misleading. E Archer

950 Reply to E Archer. WC Willett, EB Rimm, and FB Hu

951 The NHANES dietary data are physiologically implausible and inadmissible as scientific evidence. E Archer

952 Reply to E Archer. X Gu and KL Tucker

953 Mediterranean diet: ω-6 and ω-3 fatty acids and diabetes. AP Simopoulos and JJ DiNicolantonio

954 Odd-chain fatty acids as dietary biomarkers for fiber and fish intake. TM Venäläinen, MA Lankinen, and US Schwab

954 Reply to TM Venäläinen et al. K Weitkunat, S Schumann, and S Klaus

955 Dietary whole grains and zinc nutriture. HH Sandstead and AS Prasad

956 Reply to HH Sandstead and AS Prasad. D Wu, SM Vanegas, H Rasmussen, and SN Meydani

957 Considerations in hypermetabolism, cachexia, and survival in cancer. N Dominguez and T Canada

958 Reply to N Dominguez and T Canada. C Vazeille, A Jouinot, J-P Durand, L Cynober, and F Goldwasser

959 Regarding “Central adiposity and the overweight risk paradox in aging: follow-up of 130,473 UK Biobank participants”. WG Thompson

959 Reply to WG Thompson. K Bowman and D Melzer

From the American Society for Nutrition

960 Invitation for Nominations for 2018

964 Calendar of Events
