Editorials

1331 Brain stimulation for treatment of obesity: will stimulating the prefrontal cortex reduce overeating? KL Keller
See corresponding article on page 1347.

1333 Muscling out from under the yolk of the egg’s “bad” reputation. SM Phillips
See corresponding article on page 1401.

1335 Why might the finding of a new genetic association with inflammatory bowel disease be of potential value in disease control? LR Ferguson
See corresponding article on page 1508.

Original Research Communications

Obesity and eating disorders

1337 Comparison among criteria to define successful weight-loss maintainers and regainers in the Action for Health in Diabetes (Look AHEAD) and Diabetes Prevention Program trials.
SE Berger, GS Huggins, JM McCaffery, and AH Lichtenstein

1347 Neuromodulation directed at the prefrontal cortex of subjects with obesity reduces snack food intake and hunger in a randomized trial.
S Heinitz, M Reinhardt, P Piaggi, CM Weise, E Diaz, EJ Stinson, C Venti, SB Votruba, EM Wassermann, M Alonso-Alonso, J Krakoff, and ME Gluck
See corresponding editorial on page 1331.

Lipids

1358 Differential impact of the cheese matrix on the postprandial lipid response: a randomized, crossover, controlled trial.

Nutritional status, dietary intake, and body composition

1366 Functional vitamin B-6 status and long-term mortality in renal transplant recipients.
I Minovic, A van der Veen, M van Faassen, IJ Riphagen, E van den Berg, C van der Ley, AW Gomes-Neto, JM Geleijnse, M Eggersdorfer, GJ Navis, IP Kema, and SJL Bakker

1375 The effects of dietary protein intake on appendicular lean mass and muscle function in elderly men: a 10-wk randomized controlled trial.

Carbohydrate metabolism and diabetes

1384 Pomegranate juice, but not an extract, confers a lower glycemic response on a high–glycemic index food: randomized, crossover, controlled trials in healthy subjects.
A Kerimi, H Nymåe-Silawwe, JS Gauer, FA Tomás-Barberán, and G Williamson

1394 A systematic review and meta-analysis of nutrition therapy compared with dietary advice in patients with type 2 diabetes.
G Møller, H Keinke Andersen, and O Snorgaard

Energy and protein metabolism

1401 Consumption of whole eggs promotes greater stimulation of postexercise muscle protein synthesis than consumption of isonitrogenous amounts of egg whites in young men.
S van Vliet, EL Shy, S Abou Sawan, JW Beals, DWD West, SK Skinner, AV Ulanov, Z Li, SA Paluska, CM Parsons, DR Moore, and NA Burd
See corresponding editorial on page 1333.

Vitamins, minerals, and phytochemicals

1413 A 1-h time interval between a meal containing iron and consumption of tea attenuates the inhibitory effects on iron absorption: a controlled trial in a cohort of healthy UK women using a stable iron isotope.
SF Ahmad Fuzi, D Kollier, S Bruggaber, DIA Pereira, JR Dainty, and S Mushtaq

1422 Bone mineral density during pregnancy in women participating in a randomized controlled trial of vitamin D supplementation.
W Wei, JR Shary, E Garrett-Mayer, B Anderson, NE Forestieri, BW Hollis, and CL Wagner
Effects of potassium supplements on glucose metabolism in African Americans with prediabetes: a pilot trial. R Chatterjee, C Slentz, CA Davenport, J Johnson, P-H Lin, M Muehlbauer, D D’Alessio, LP Svetkey, and D Edelman

Pregnancy and lactation

Growth, development, and pediatrics

Breastfeeding and motor development in term and preterm infants in a longitudinal US cohort. KA Michels, A Ghassabian, SL Mumford, R Sundaram, ELM Bell, SC Bello, and EH Yeung

A high-glycemic diet is associated with cerebral amyloid burden in cognitively normal older adults. MK Taylor, DK Sullivan, RH Swerdlow, ED Vidoni, JK Morris, JD Mahnken, and JM Burns

Nutritional epidemiology and public health

Comparison of global nutrient profiling systems for restricting the commercial marketing of foods and beverages of low nutritional quality to children in Canada. M-`E Labonté, T Poon, C Mulligan, JT Bernstein, B Franco-Arellano, and MR L’Abbé

International nutrition

Eggs early in complementary feeding increase choline pathway biomarkers and DHA: a randomized controlled trial in Ecuador. LL Iannotti, CK Lutter, WF Waters, CA Gallegos Riofrio, C Malo, G Reinhart, A Palacios, C Karp, M Chapnick, K Cox, S Aguirre, L Narvaez, F López, R Siddhu, P Kell, X Jiang, H Fujiwara, DS Ory, R Young, and CP Stewart

Low serum ω-3 and ω-6 polyunsaturated fatty acids and other metabolites are associated with poor linear growth in young children from rural Malawi. RD Semba, I Trehan, X Li, N Salem Jr., R Moaddel, MI Ordiz, KM Maleta, K Kraemer, and MJ Manary

Gene-nutrient interactions

The SLC2A14 gene, encoding the novel glucose/dehydroascorbate transporter GLUT14, is associated with inflammatory bowel disease. M Amir Shaghaghi, H Zhouyao, H Tu, H El-Gabalawy, GH Crow, M Levine, CN Bernstein, and P Eck

See corresponding editorial on page 1335.

Dietary supplements

Effects of isolated soluble fiber supplementation on body weight, glycemia, and insulinemia in adults with overweight and obesity: a systematic review and meta-analysis of randomized controlled trials. SV Thompson, BA Hannon, R An, and HD Holscher

Efficacy of iron supplementation may be misinterpreted using conventional measures of iron status in iron-depleted, nonanemic women undergoing aerobic exercise training. LM Pompano and JD Haas
