Hot soup: good as ever

Soup was always one of her favorite dishes as a girl... and it still is. But now she appreciates soup even more. She knows that soups are easy to prepare, inexpensive, easy to eat... and certainly convenient for the surprise visits of grandchildren.

Like her, many of your elderly patients might also find Campbell's Soups useful in their diets. These soups not only lend interest and enjoyment to meals but contain a variety of foods with a wide range of essential nutrients, and they have the advantage of being available in many delicious flavors and textures.

Campbell's Soups are desirable foods for the elderly for other reasons, too. In general, the calorie requirements of persons in this age group are low. They need foods which are nourishing and psychologically satisfying, yet not fattening. Therefore, you can suggest Campbell's Cream of Celery Soup with about 64 calories per 7 oz. serving, Chicken Noodle Soup (51 calories), or Chicken Gumbo (46 calories).

In sodium restricted diets for elderly patients, when only mild restriction of sodium is necessary, Campbell's Beef Noodle Soup (about 650 mg. of sodium in an average serving), Consommé (475 mg.), or Vegetarian Vegetable Soup (560 mg.) are useful.

All Campbell's Soups are carefully blended from the finest ingredients... all carefully processed to help maintain natural flavors and nutritive values.

Recommend Campbell's Soups to your patients... and, of course, enjoy them yourself. There's a soup for almost every patient and diet, for every meal.

Physician Edited - Completely Rewritten - Latest Cautions

9TH EDITION MODERN DRUG ENCYCLOPEDIA
Kept up to date with MODERN DRUGS monthly for two years

Describes the principal ethical products of 145 manufacturers. Each description gives all pertinent information in concise form—in one bound volume—with no advertising.

MODERN DRUGS—The practical time-saving way to keep posted on new drugs. This monthly supplement provides full information on newly-released products. Cumulative indexes and convenient 24-issue binder keep this companion to MODERN DRUG ENCYCLOPEDIA up-to-date. In addition, MODERN DRUGS carries manufacturers’ advertising, with a return card, so you can request samples or complete literature on any advertised product.

Only 14, and almost as tall as Dad...

During this period of rapid growth and ravenous appetite, a good breakfast goes a long way toward satisfying daily nutritional requirements and preventing between-meal hunger.

When mother includes hot Quaker Oats in her teen-ager’s breakfast, she satisfies a good proportion of his nutritional needs and brings tasteful variety by adding any of several tasteful toppings.

One serving of Quaker Oats* provides your average teen-age patient with 11% or more of the RDA of calcium, niacin, riboflavin and thiamine; over 9% of protein and 9% of iron. Quaker Oats can be quickly prepared to fit a teen-ager’s busy morning schedule and to help maintain the steady, normal growth so vital to his physical and emotional well-being.

For more information, write Medical Service Dept., for a copy of our booklet, “Why Oatmeal is Naturally Nutritious.”

---

*1 oz. rolled oats, 4 oz. whole milk, 1 tsp. sugar.

The Quaker Oats Company

CHICAGO 54, ILLINOIS
Your obese patient's diet probably requires him to eat less food than he has been in the habit of eating, but—in order to maintain health and strength—the food he does eat should be of a good quality. **Carnation Instant Nonfat Dry Milk** provides wholesome nutritional values while contributing importantly to the over-all objective of weight reduction. Without the fat—and with only half of the caloric content—**Carnation Instant** supplies all the protein, calcium, phosphorus and B-vitamins of fresh, whole milk. And your patient will "go along" with the good, rich flavor and economy of **Carnation Instant Nonfat Dry Milk**—costs as little as nine cents a quart. As a complete meal replacement, 1 1/2 cups of **Carnation Instant** mixed with 1 quart of fresh, whole milk daily, provides 1000 calories and 70 grams of protein. *Each reconstituted ounce of Carnation Instant Nonfat Dry Milk supplies only 10 calories.*

**METHISCHOL®**

Methischol, the original, complete lipotropic formula together with a low fat, moderate protein diet, helps to prevent and treat fatty infiltration and fatty degeneration of the liver, and consequent cirrhosis by helping to...

**remove infiltrated fat and thus reduce liver size and tendency to fibrosis**

**contribute to increased phospholipid turnover and regeneration of new liver cells**

The suggested daily therapeutic dose of 9 Methischol capsules or 3 tablespoonfuls of Methischol syrup provides:

- CHOLINE DIHYDROGEN CITRATE* ........ 2.5 Gm.
- DL METHIONINE .................. 1.0 Gm.
- INOSITOL .......................... 0.75 Gm.
- VITAMIN B12 ...................... 18 mcg.
- LIVER CONCENTRATE AND DESICCATED LIVER** .... 0.78 Gm.

*Present in syrup as 1.14 Gm. Choline Chloride

**Present in syrup as 1.2 Gm. Liver Concentrate
