Young Receives Award for Distinguished Achievement

At an October 19 dinner in his honor, ASCN member Vernon Young, PhD, DSc, was presented the Bristol-Myers Squibb/Mead Johnson Award for Distinguished Achievement in Nutrition Research. The $50,000 award is part of the Bristol-Myers Squibb Unrestricted Biomedical Research Grants Program.

Currently a Professor of Nutritional Biochemistry at the School of Science of the Massachusetts Institute of Technology and Director of the Mass Spectrometry Facility at the Shriners Burns Institute in Boston, Young pioneered studies of amino acid metabolism and proposed new international requirements for dietary intake of essential amino acids. During the past 15 years, Young has developed a noninvasive technique for quantifying amino acid loss from the body against a given level of intake.

Young did postgraduate work at the University of Cambridge and earned his PhD in nutrition from the University of California at Davis. He joined the faculty of MIT in 1966, served as associate program director for the MIT Clinical Research Center in 1985–1987, and became Director of the Mass Spectrometry Facility at Shriners Burns Institute in 1991.

Young is a member of the National Academy of Sciences and the Academy’s Institute of Medicine. He is a past Director of the American Board of Nutrition and past President of the American Institute of Nutrition (AIN). He has received the Gopalan Oration and Gold Medal from the Nutrition Society of India, the Rank Prize in Nutrition in the United Kingdom, the McCollum Award from the ASCN, and the Mead Johnson and Borden Awards from the AIN. Young also has served on the editorial boards of the AJCN, The Journal of Nutrition, Advances in Nutrition Research, and The Journal of Gerontology.

Diabetes in America, 2nd Edition Recently Published

The US National Diabetes Data Group, National Institutes of Health, has published an assessment of the scope and impact of diabetes in the United States. Diabetes in America, 2nd edition comprises 36 chapters and is written by recognized experts, who address the descriptive epidemiology of diabetes, complications of the disease, characteristics of therapy and medical care for diabetes, economic aspects, and diabetes in special races and ethnic populations. The volume is 781 pages and includes 345 tables, 596 figures, 150 appendices, and an index. The book is available for $20 postage and handling from The National Diabetes Information Clearinghouse, National Institute of Diabetes and Digestive and Kidney Diseases, One Information Way, Bethesda, MD 20892-3560. (301) 654-3327.

Free Metals Handbook for Scientists and Engineers

Recently published by the Atlantic Equipment Engineers, a free handbook (AEEREF) on metal powders and compounds contains technical data useful to all research and development scientists, engineers, and technicians in medicine, pharmacueticals, biotechnology, chemistry, aerospace, electronics, and armaments. The handbook includes applications for and descriptions and histories of all elements; data on high-purity metal powders, chemicals, alloying materials, biomedical research materials, and exotic materials; periodic tables, temperature conversion charts, mineral hardness, metal content, and color identifiers; and more than 4000 scientific conversion factors.

To receive a free copy, write AEEREF, PO Box 181, Bergenfield, NJ 07621, 1-800-486-2436. Fax 201-387-0291.

Applications Sought for Postdoctoral and Senior Research Associateships

The National Research Council is accepting applications for the 1996 Resident, Cooperative, and Postdoctoral Research Associateship Programs, conducted on behalf of over 100 research laboratories through the United States. Approximately 420 new full-time associateships will be awarded on a competitive basis for research in chemistry; earth and atmospheric sciences; engineering; applied sciences and computer science; life, medical, and behavioral sciences; mathematics; space and planetary sciences; and physics. Awards are for one or two years, renewable for a maximum of three years. Senior applicants who have held the doctorate for at least five years may request shorter periods. Annual stipends for recent PhD’s range from $32,000 to $45,000. Applications submitted directly to the National Research Council are accepted continuously throughout the year. Those postmarked no later than January 15, 1996 will be reviewed in February, by April 15 in June, and by August 15 in October. Initial awards will be announced in March and April, July and November. Contact National Research Council, Associateship Programs (TI 2094/D3), 2101 Constitution Avenue, NW, Washington, DC 20418. Fax 202-334-2759.

Applications Available for the Regional Training Programme on Food and Nutrition Planning

The 12th Course of the Regional Training Programme on Food and Nutrition Planning, which leads to a master’s degree in food and nutrition planning, will begin in April 1996 at the University of the Philippines at Los Baños. The 18-month course is organized in cooperation with the Netherlands Organization for International Cooperation in Higher Education and the Food and Agriculture Organization of the United Nations. Training covers general course work in food and nutrition, economics, statistics, communication, and food science. Seminars and workshops, field studies, macroplanning, and an agency practicum complete the course.

Limited fellowships may be available. Applicants are advised to find outside funding from their governments and organizations such as the FAO, UNDP, WHO, UNICEF, UNESCO, USAID, SEARCA, and the World Bank. Candidates must possess a bachelor’s degree or equivalent in a related field, have an academic record indicating ability to pursue a graduate program, and preferably come from countries in Asia and the Pacific.

Applications should be submitted no later than January 31, 1996 to the Dean of the Graduate School, UP at Los Baños College, Laguna, Philippines. Applicants interested in an FNP fellowship should apply to the department of Food and Nutrition Planning before November 30, 1995. Send inquiries to The Director, UPLB-FNP College, Laguna, 4031 Philippines.
November 30–December 3, 1995
_Cytokines and the Gut_, Kiawah Island, SC. Sponsored by the US-Japan Malnutrition Panel. Held in collaboration with the US-Japan Panel on Cholera and Related Diarrheal Diseases. Registration requests were due September 1. Final booking of hotel rooms was due September 15. Contact Van Hubbard, Chief, Nutritional Sciences Branch, Building 45, Room 6AN-18F, 45 Center Drive MSC 6600, National Institutes of Health, Bethesda, MD 20892-6600. (301) 594-8883.

UNIVERSITY OF TORONTO
Department of Nutritional Sciences,
Faculty of Medicine

Applications are invited for a tenure-stream appointment at the Assistant or Associate Professor level in the Department of Nutritional Sciences, Faculty of Medicine, University of Toronto. This appointment will begin in July of 1996.

Applicants should hold a Ph.D. and have a strong background in nutritional biochemistry or physiology with an emphasis on metabolism.

Applicants should have a proven ability to mount an independent research program and obtain peer reviewed funding. The successful candidate will be expected to participate in graduate and undergraduate teaching.

Salary and rank will be commensurate with qualifications and experience.

Applicants should send their curriculum vitae, with the names of three referees to: Dr. Heather Maclean, Chair, Department of Nutritional Sciences, FitzGerald Building, University of Toronto, Toronto, Ontario, MSS 1A8.

Application deadline is January 15, 1996.

In accordance with its Employment Equity Policy, the University of Toronto encourages applications from qualified women and men, members of visible minorities, aboriginal peoples and persons with disabilities.

In accordance with Canadian Immigration requirements, this advertisement is directed to Canadian citizens and permanent residents.

University of Alabama at Birmingham
Department of Nutrition Sciences
Energy Metabolism Research Unit
Junior Faculty Position

UAB offers an opportunity to join an interdisciplinary research team investigating the role of diet and energy expenditure in the development and prevention of obesity. Candidates must possess at least a PhD in a related field of study. Have a major interest in animal metabolism and physiology and the ability to attract extramural research support.

Position will be 12-month, full-time: proposed start date: January, 1996. Salary, rank and tenure will be commensurate with qualifications and experience.

Interested investigators should send a letter of intent, cv and names of three references to:

Michael I. Goran, PhD
Director, Energy Metabolism Research Unit
Department of Nutrition Sciences
1675 University Boulevard
University of Alabama at Birmingham
Birmingham, AL 35294

Minorities and women are encouraged to apply.

MANAGER NUTRITIONAL SCIENCE

As the parent company of such food ingredient companies as NutriSweet and Kelco, Monsanto has a singular commitment to teamwork and employee input. Our Worldwide Regulatory Affairs division, located in Deerfield, IL, has created an environment in which professionals can take ideas-and careers--to new lengths. We currently have an outstanding opportunity available for an experienced nutritional scientist.

You will be responsible for supporting regulatory initiatives that will require nutritional assessment of new foods, food additives, and food products prior to approval. You will also evaluate new product opportunities, implement nutritional guidance in the development of new products, and represent the company in matters of nutrition. In addition, you will establish nutritional science databases and programs as well as prepare scientific publications.

We require a Ph.D. in Nutritional Science, or related field, along with 1-3 years of post-doctoral experience, preferably with a major food company. We also require familiarity with regulatory requirements, outstanding communication and presentation skills, and a proven publication record with solid experience in academic research. This position requires moderate travel.

Enjoy the support and benefits of working for an industry leader. In return for your expertise, we offer an excellent salary and benefits package. For consideration, please submit your resume with salary history to: Monsanto, Human Resources Dept., AC-MNS, 1751 Lake Cook Road, Deerfield, IL 60015-5239. Fax: 708/495-6821. An Equal Opportunity Employer M/F/D/V.
ASSISTANT PROFESSOR

Division of Nutritional Sciences at Cornell University is seeking an assistant professor, tenure-track, for a twelve month position which involves both teaching and research, to develop a strong program in nutrition that relies on behavioral or metabolic aspects of preventative and therapeutic nutrition and to provide leadership to Division's undergraduate and graduate dietetics programs. Applicants’ research interests may be in areas that relate to diet and health. Ph.D. and/or M.D. or equivalent degree required with related professional experience and demonstrate potential for outstanding accomplishments in research and teaching. Candidates must be Registered Dietitians. Please send CV and names of 3 references to: V. Utermohlen, M.D., Associate Professor, Cornell University, Division of Nutritional Sciences, Savage Hall, Ithaca, NY 14853. AA/EOE and encourages applications from women and minorities.

ASSISTANT PROFESSOR
Department of Nutrition and Dietetics

Nutrition - Assistant Professor - tenure track for September, 1996. Responsibilities include teaching primarily upper division undergraduate courses in nutrition science. Direct graduate student research (laboratory space available). Develop research program capable of attracting external funding. Participate in academic advising, campus committees and professional service. Qualifications: An earned doctorate in nutrition science required. Evidence of ability to teach and perform scholarly activity in areas of human nutrition science. Experience, a post-doctorate and/or R.D. desirable but not required. The University of Delaware is a land grant, sea grant. space grant University with 15,000 undergraduate and 5,000 graduate students. The Department of Nutrition and Dietetics is one of four departments in the College of Human Resources which has approximately 1,000 majors. The Department has eleven faculty with a growing undergraduate program of 230 majors in Dietetics, Applied Nutrition and Nutrition Sciences. It has a new ADA Dietetics Internship and a small master's program. Send letter of application, vita, official transcripts, and three letters of reference to Dr. Louise Little, Search Committee Chairperson, Department of Nutrition and Dietetics, University of Delaware, Newark, DE 19716. Tel: (302) 831-8729, Fax: (302) 831-4186, E-Mail: little@strauss.udel.edu. Closing date January 10, 1996.

The UNIVERSITY OF DELAWARE is an Equal Opportunity Employer which encourages applications from Minority Group Members and Women.

NUTRITION
IN HEALTH & DISEASE

Keep current with the acknowledged source of nutrition information.

- We read more than 300 key scientific journals every month.
- We extract the latest and most important new research findings.
- We summarize these findings in a few clear, concise paragraphs.
- We reference each summary with a full citation and provide an address for obtaining reprints.
- Annual Subscription (12 issues plus index) $96. Overseas subscribers add $10 for airmail postage.

A.S.P.E.N. RESEARCH WORKSHOP ON NUTRITION AND CRITICAL ILLNESS

The A.S.P.E.N. Research Workshop on Nutrition and Critical Illness will be held Sunday, January 14, 1996, one day before the official start of the 20th Clinical Congress in Washington, DC. The day-long event will be chaired by Danny Jacobs, MD, and Thomas Ziegler, MD. Participants will consist of the chairpersons, several panelists, and invited guests. Selection of the panelists and many of the guests will be made by the chairpersons and will be based on their ability to contribute to the scientific content of the program. A number of seats are being reserved for students and fellows.

If you are interested in attending, please send a note stating your interest and a current CV to the A.S.P.E.N. Research and Data Committee, 8630 Fenton Street, Suite 412, Silver Spring, MD 20910-3805 no later than December 1, 1995.

Nutritionist Program Coordinator

The State of Maryland Department of Health & Mental Hygiene seeks a Nutritionist to coordinate a state-wide program of medical follow-up for children and adults with inherited metabolic diseases. The primary functions of the position are diet monitoring and case management for pediatric and adult patients. Other responsibilities include development of educational manuals and presentations for patients and professionals.

Qualifications: Master’s Degree in Nutrition or a related health discipline. Registration, State Licensure, and 4 years experience in a clinical or public health facility. Salary: $29,357 - $38,556. Full-time position with benefits. Send resume, references, and writing samples to:

Elizabeth Emerick, Program Administrator
Office for Hereditary Disorders
PO Box 13528; Baltimore, MD 21203
