Editorials

525  Is vitamin C an antiinflammatory agent? I Jialal and U Singh
See corresponding article on page 567.

527  Dairy consumption and the prevention of colon cancer: is there more to the story than
calcium? JC Fleet
See corresponding article on page 667.

Commentary

529  A new proposed guidance system for beverage consumption in the United States.
BM Popkin, LE Armstrong, GM Bray, B Caballero, B Frei, and WC Willett

Original Research Communications

Obesity and eating disorders

543  Association of body size with health status in patients beginning dialysis. KL Johansen,
NG Kutner, B Young, and GM Chertow

550  Breastfeeding, introduction of complementary foods, and adiposity at 5 y of age.
HL Burdette, RC Whitaker, WC Hall, and SR Daniels

559  Calcium and dairy intakes in relation to long-term weight gain in US men.
SN Rajpathak, EB Rimm, B Rosner, WC Willett, and FB Hu

Cardiovascular disease risk

567  Associations of vitamin C status, fruit and vegetable intakes, and markers of
inflammation and hemostasis. SG Wannamethee, GDO Lowe, A Rumley,
KR Bruckdorfer, and PH Whincup
See corresponding editorial on page 525.
See corresponding CME exam on page 726.

575  Mediterranean-inspired diet lowers the ratio of serum phospholipid n–6 to n–3 fatty
acids, the number of leukocytes and platelets, and vascular endothelial growth factor in
healthy subjects. A Ambring, M Johansson, M Axelsen, L Gan, B Strandvik, and
P Friberg

582  Assessment of the longer-term effects of a dietary portfolio of cholesterol-lowering
foods in hypercholesterolemia. DJA Jenkins, CWC Kendall, DA Faulkner, T Nguyen,
T Kemp, A Marchie, JMW Wong, R de Souza, A Emam, E Vidgen, EA Troutwein,
KG Lapsley, C Holmes, RG Josse, LA Leiter, PW Connelly, and W Singer

592  Soy-isoflavone-enriched foods and markers of lipid and glucose metabolism in
postmenopausal women: interactions with genotype and equol production. WL Hall,
K Vafeiadou, J Hallund, S Bugel, M Reimann, C Koebnick, H-J Zunft, M Ferrari,
F Branca, T Dadd, D Talbot, J Powell, A-M Minihane, A Cassidy, M Nilsson,
K Dahlman-Wright, J-A Gustafsson, and CM Williams

601  β-Glucan incorporated into a fruit drink effectively lowers serum LDL-cholesterol
concentrations. E Naumann, AB van Rees, G Önning, R Öste, M Wydra, and
RP Mensink

Nutritional status, dietary intake, and body composition

606  Conjugated linoleic acid supplementation for 1 y does not prevent weight or body fat
regain. TM Larsen, S Toubro, O Gudmundsen, and A Astrup

613  Reduced body protein in children with spastic quadriplegic cerebral palsy.
FE Arrowsmith, JR Allen, KJ Gaskin, MA Gruca, SL Clarke, JN Briody,
RB Howman-Giles, H Somerville, and EV O’Loughlin

Energy and protein metabolism

619  Total sulfur amino acid requirement of healthy school-age children as determined by
indicator amino acid oxidation technique. JM Turner, MA Humayun, R Elango, M Rafii,
V Langos, RO Ball, and PB Pencharz
Vitamins, minerals, and phytochemicals

624 Olestra is associated with slight reductions in serum carotenoids but does not markedly influence serum fat-soluble vitamin concentrations. ML Neuhouser, CL Rock, AR Kristal, RE Patterson, D Neumark-Sztainer, LJ Cheskin, and MD Thornquist

632 Iron status and food matrix strongly affect the relative bioavailability of ferric pyrophosphate in humans. D Moretti, MB Zimmermann, R Wegmüller, T Walczyk, C Zeder, and RF Hurrell

639 Longitudinal examination of 24-h urinary iodine excretion in schoolchildren as a sensitive, hydration status-independent research tool for studying iodine status. T Remer, N Fonteyn, U Alexy, and S Berkemeyer

Pregnancy and lactation

647 Diet-induced iron deficiency anemia and pregnancy outcome in rhesus monkeys. MS Golub, CE Hogrefe, AF Tarantal, SL Germann, JL Beard, MK Georgieff, A Calatroni, and B Lozoff

657 Randomized, placebo-controlled, calcium supplementation study in pregnant Gambian women: effects on breast-milk calcium concentrations and infant birth weight, growth, and bone mineral accretion in the first year of life. LMA Jarjou, A Prentice, Y Sawo, MA Laskey, J Bennett, GR Goldberg, and TJ Cole

Cancer

667 Calcium and dairy food intakes are inversely associated with colorectal cancer risk in the Cohort of Swedish Men. SC Larsson, L Bergkvist, J Rutegård, E Giovannucci, and A Wolk

See corresponding editorial on page 527.
See corresponding CME exam on page 728.

Nutritional epidemiology and public health

674 Changes in caffeine intake and long-term weight change in men and women. E Lopez-Garcia, RM van Dam, S Rajpathak, WC Willett, JE Manson, and FB Hu

681 Physiologic mechanisms can predict hematologic responses to iron supplements in growing children: a computer simulation model. W Sharieff, S Zlotkin, M Tondeur, B Feldman, and G Tomlinson

688 Transgenerational effects of betel-quid chewing on the development of the metabolic syndrome in the Keelung Community-based Integrated Screening Program. TH-H Chen, Y-H Chiu, and BJ Boucher

693 A double-blind, randomized, clinical trial of the effect of vitamin A and zinc supplementation on diarrheal disease and respiratory tract infections in children in Mexico City, Mexico. KZ Long, Y Montoya, E Hertzmark, JI Santos, and JL Rosado

Gene-nutrient interactions

708 Interactions among polymorphisms in folate-metabolizing genes and serum total homocysteine concentrations in a healthy elderly population. AM Devlin, R Clarke, J Birks, JG Evans, and CH Halsted

Bone metabolism

714 Growth, bone mass, and vitamin D status of Chinese adolescent girls 3 y after withdrawal of milk supplementation. K Zhu, Q Zhang, LH Foo, A Trube, G Ma, X Hu, X Du, CT Cowell, DR Fraser, and H Greenfield
Letters to the Editor

722 Assessing nutritional quality. RP Heaney and K Rafferty

723 Errata

Book Review

725 Terrors of the Table: the Curious History of Nutrition, edited by Walter Gratzer. Reviewed by KJ Carpenter

Continuing Medical Education

726 Wannamethee SG et al. Associations of vitamin C status, fruit and vegetable intakes, and markers of inflammation and hemostasis.

728 Larsson SC et al. Calcium and dairy food intakes are inversely associated with colorectal cancer risk in the Cohort of Swedish Men.
