Now with enhanced content! Summaries of each research report outlining potential applications and takeaways for your practice are included in the 2013 volume. These summaries provide added value and analysis of what the study means in practical terms.

As popular interest in nutrition and wellness increases, this collection features key updates on hot topics like obesity, chronic disease, pregnancy, and dietary supplements. The Best of Clinical Nutrition includes critical discoveries made in these areas — making it a necessary reference for you to own. An accurate assessment of current knowledge in nutrition emerges from this collection, which is invaluable for clinicians, dietitians, and policy makers.

Studies featured in the 2013 edition include:
- Calcium supplements and cardiovascular disease risk
- Sustainable diets: can we reduce greenhouse gas emissions by eating a healthy diet?
- Prebiotics and the health benefits of fiber
- Salmon consumption during pregnancy and human breast milk
- Lifestyle determinants of the drive to eat

EDITORIALS

You are what your mother ate? CIW Kaluawee
See corresponding article on page 1317. 1157

Urinary magnesium excretion as a marker of heart disease risk. SC Larson
See corresponding editorial on page 1299. 1159

Unraveling the digestion of milk protein. RP Ross et al
See corresponding article on page 1314. 1161

NARRATIVE REVIEW

Management of protein-energy wasting in non-dialysis-dependent chronic kidney disease: reconceiving low protein intake with nutritional therapy. CP Kovesdy et al

ORIGINAL RESEARCH COMMUNICATIONS

Obesity and eating disorders
Factors predicting overweight in US kindergartners. G Flores and H Lin 1178

Elevated energy intake is correlated with hyperresponsivity in attentional, gustatory, and reward brain regions while anticipating palatable food receipt. KS Burger and E Sless 1168

The obesity paradox in the US population. JA Greenberg 1195

Lipids
Effect of cocoa and theobromine consumption on serum HDL-cholesterol concentrations: a randomized controlled trial. H Neufingerl et al 1201

Nutritional status, dietary intake, and body composition
Efficacy of a dose range of simulated sunlight exposures in varying vitamin D status in South Asian adults: implications for targeted guidance on sun exposure. MD Faner et al 1210

Vitamins, minerals, and phytochemicals
DNA methylation potential: dietary intake and blood concentrations of one-carbon metabolites and folates in rural African women. P Dominiguez-Salles et al
See corresponding editorial on page 1157. 1217

Lack of a relation between serum 25-hydroxyvitamin D concentrations and asthma in adolescents. PU Gergen et al
See corresponding editorial on page 1157. 1228

Evaluation of Vitamin D Standardization Program protocols for standardizing serum 25-hydroxyvitamin D data: a case study of the program’s potential for national nutrition and health surveys. KD Cashman et al 1235

Pregnancy and lactation
Low folate status enhances pregnancy changes in plasma betaine and dimethylglycine concentrations and the association between betaine and homocysteine. S Fernandez-Rio et al 1252

Growth, development, and pediatrics
Growth and bone health in pediatric intestinal failure patients receiving long-term parenteral nutrition. J Pichler et al 1260

Effect of preterm birth and birth weight on eating behavior at 2 y of age. A Manolescu et al 1270

AIDS and other wasting syndromes
Weight change at 1 mo of antiretroviral therapy and its association with subsequent mortality, morbidity, and CD4 T cell reconstitution in a Tanzanian HIV-infected adult cohort. CR Sudfeld et al 1278

Nutritional epidemiology and public health
Consumer attitudes and understanding of low-sodium claims on food: an analysis of healthy and hypertensive individuals. C L Wong et al 1288

Urinary plasma magnesium and risk of ischemic heart disease. MM Joosset et al
See corresponding editorial on page 1159. 1299

Sex and dieting modify the association between emotional eating and weight status. S Finnea et al 1307

Sequential release of milk protein-derived bioactive peptides in the jejunum in healthy humans. K A Migraine et al
See corresponding editorial on page 1157. 1314

Fish consumption in infancy and development of allergic disease up to age 12 y. J Magnusson et al 1324

Dietary patterns in association with postpartum weight retention. KS Bighossian et al 1338

Nut intake and adiposity: meta-analysis of clinical trials. G Flores-Mateo et al 1346

Long-term alcohol and caffeine intake and risk of sudden cardiac death in women. MA Berthia et al 1356
