The American Journal of Clinical Nutrition (ISSN 0002-816x) is a publication of the American Society for Nutrition, 9650 Rockville Pike, Bethesda, MD 20814-3998 USA. The Journal is published monthly with two volumes per year. The primary focus of the Journal is the publication of basic and clinical studies relevant to human nutrition. To provide information for authors or to submit a manuscript, please visit http://ajcn.nutrition.org.

The American Society for Nutrition (ASN) is the premier research society dedicated to bringing together the world’s top researchers and clinicians to advance our knowledge and application of nutrition science. Members of ASN benefit from relationships ranging from free access to the top peer-reviewed journals in the nutrition and dietary sciences to reduced registration rates for topical meetings and conferences. Take advantage of the following ten ways that ASN can help you advance your career by becoming a member today!

1. CUTTING-EDGE SCIENTIFIC PROGRAMMING
ASN Scientific Sessions & Annual Meeting on Experimental Biology is an interdisciplinary, scientific meeting, bringing together more than 15,000 scientists from around the globe. The annual Advances and Conferences in Clinical Nutrition is designed to communicate significant, cutting-edge advances in nutrition research, and to stimulate discussion on emerging topics that impact human health.

2. TOP RANKED PUBLICATIONS
ASN members receive free online access to The American Journal of Clinical Nutrition (AJCN), The Journal of Nutrition (JN) and Advances in Nutrition (AN).

3. REDUCED REGISTRATION RATES
Members receive reduced conference registration rates to Experimental Biology’s $165 savings!, Advances and Conferences in Clinical Nutrition ($100 off) and co-sponsored meetings throughout the year.

4. REDUCED PUBLICATION FEES
Members receive discounted print subscription, page charges and waived manuscript submission fees. Additionally, ASN members are eligible to receive our partner publication, Nutrition Today, at a 58% discount off of the regular subscription rate.

5. EDUCATIONAL RESOURCES
ASN’s online educational portfolio contains podcasts, author videos, recorded webinars, virtual conference sessions, blog entries and more.

6. MEMBERSHIP IN FASEB
You receive a variety of important additional benefits through ASN’s membership in the Federation of American Societies for Experimental Biology (FASEB) alliance such as access to FASEB’s Legislative Action Center, subscription discounts for The FASEB Journal, online access to the FASEB Member Directory and career development resources.

7. NETWORKING OPPORTUNITIES
All members are eligible to join one of our 25 Research Interest Sections (RIS). The RIS are communities designed to provide a mechanism for topic-specific discussion regarding nutrition research and practice. Additionally, members are encouraged to join one or more of the following Scientific Councils: Medical Nutrition, Global Nutrition, and Nutritional Sciences.

8. NUTRITION RESEARCH SUPPORT
ASN is your voice and is committed to increasing the investment in nutrition research. We make it our mission to provide our members with the information and resources necessary to take a stand for nutrition research.

9. AWARDS AND RECOGNITION
In recognition of our member’s professional accomplishments, ASN honors scientists, clinicians and scholars for significant achievements in nutrition research and practice. The program grants over $452,000 in scientific awards, student grants, travel awards and honors.

10. GLOBAL CONNECTIONS
ASN is a global organization that enables its members to form relationships with top nutrition researchers throughout the world. ASN is the U.S. Adhering Body to the International Union of Nutritional Sciences.
The Best of Clinical Nutrition 2013
Highlights from the American Society for Nutrition’s Scholarly Journals

Now with enhanced content! Summaries of each research report outlining potential applications and takeaways for your practice are included in the 2013 volume. These summaries provide added value and analysis of what the study means in practical terms.

As popular interest in nutrition and wellness increases, this collection features key updates on hot topics like obesity, chronic disease, pregnancy, and dietary supplements. The Best of Clinical Nutrition includes critical discoveries made in these areas — making it a necessary reference for you to own. An accurate assessment of current knowledge in nutrition emerges from this collection, which is invaluable for clinicians, dietitians, and policy makers.

Studies featured in the 2013 edition include:
• Calcium supplements and cardiovascular disease risk
• Sustainable diets: can we reduce greenhouse gas emissions by eating a healthy diet?
• Prebiotics and the health benefits of fiber
• Salmon consumption during pregnancy and human breast milk
• Lifestyle determinants of the drive to eat

EDITORIALS
Pediatric body composition references: What’s missing?... 1
EW Demirath and WJ Johnson
See corresponding article on page 49.

Should we be taking B vitamins to prevent age-related macular degeneration? Not yet, but worth doing more research. J Evers... 4
See corresponding article on page 129.

NARRATIVE REVIEW
Public health impact of dietary phosphorus excess on bone and cardiovascular health in the general population. MS Calvo and J Urbani... 6

ORIGINAL RESEARCH COMMUNICATIONS
Obesity and eating disorders
Gut microbiota after gastric bypass in human obesity: increased richness and associations of bacterial genera with adipose tissue genes. LC Kong et al... 16

Concomitant changes in sleep duration and body weight and body composition during weight loss and 3-mo weight maintenance. SPM Verhoef et al... 25

Lipids
Short-term, high-fat diet increases the expression of key intestinal genes involved in lipoprotein metabolism in healthy men. AJ Vremilya et al... 32

Nutritional status, dietary intake, and body composition
Effect of serum folate status on total folate and 5-methyltetrahydrofolate in human skin. LZ Rasouli et al... 42

Fat and lean BMI reference curves in children and adolescents and their utility in identifying excess adiposity compared with BMI and percentage body fat. DF Weber et al... 49
See corresponding editorial on page 1.

Energy and protein metabolism
Brown adipose tissue activity after a high-calories meal in humans. MJ Visselhaman et al... 57

Vitamins, minerals, and phytochemicals
The absorption of iron from whole diets: a systematic review. RS Czitrom et al... 65

Pregnancy and lactation
Effect of calcium plus vitamin D supplementation during pregnancy in Brazilian adolescents mothers: a randomized, placebo-controlled trial. MEL Douglas et al... 82

Impact of continuing folate acid after the first trimester of pregnancy: findings of a randomized trial of Folic Acid Supplementation in the Second and Third Trimesters. BM McNulty et al... 92

Nutritional support
Blood type diets lack supporting evidence: a systematic review. L Cusack et al... 99

Vitamin D status and breast cancer in Saudi Arabian women: case-control study. FY Youssef et al... 105

Diet, microbiota, and microbial metabolites in colon cancer risk in rural Africans and African Americans. J Hu et al... 111

Aging
Minced beef is more rapidly digested and absorbed than beef steak, resulting in greater postprandial protein retention in older men. B Perring et al... 121

Nutritional epidemiology and public health
Homocysteine, folate, vitamins B-12, and 10-y incidence of age-related macular degeneration. BJ Gopinath et al... 129
See corresponding editorial on page 4.

Dietary glycine and blood pressure: the International Study on Macro/Micronutrients and Blood Pressure. J Stamler et al... 136

Egg consumption in relation to risk of cardiovascular disease and diabetes: a systematic review and meta-analysis. JS Shin et al... 146

Circulating and dietary magnesium and risk of cardiovascular disease: a systematic review and meta-analysis of prospective studies. LC Del Gobbo et al... 160

Plasma 25-hydroxyvitamin D associated with pulmonary function in Canadian adults with excess adiposity. S Khan et al... 174

Dietary sodium intake is associated with total fluid and sugar-sweetened beverage consumption in US children and adolescents aged 2–18 y: NHANES 2005–2006. CA Grimes et al... 189

Association between circulating K1 and coronary calcium progression in community-dwelling adults: the Multi-Ethnic Study of Atherosclerosis. MK Shua et al... 197

Urinary flavonoid excretion and risk of acute coronary syndrome in a nested case-control study. LM Brezinski et al... 209
